Take Time to Plan Environmental Messenger™

Environmental Challenges

Environmental Challenges come in all forms:

- changing legislation
- failure of equipment
- severe weather
- wasted energy
- wasted water
- wasted resources
- public concerns and
- the cost of waste disposal

There are all sorts of opportunities to protect ourselves from these challenges:

Training employees to:

- acknowledge they are part of the environment
- look for new ways of doing things to support the environment
- create new ideas and new opportunities
- understand their role
- make decisions for the environment and
- know how to react if things go wrong

Audit operations to operate efficiently by:

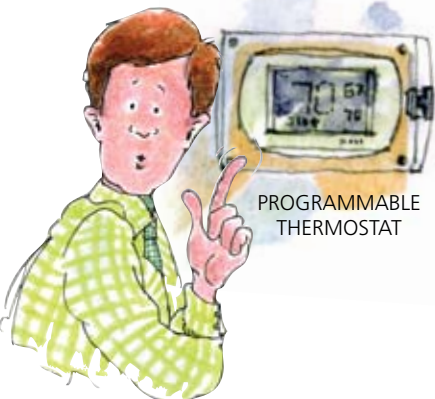

- taking prevention action
- designing for the environment
- using less energy
- using fewer resources
- creating less waste

Take time to plan

- address environmental challenges before they happen
- build harmonious relations with our neighbours and stakeholders
- look at all aspects of a project and plan with that in mind
- anticipate what could challenge us and take action to address the challenge before it happens

ENVIRONMENTAL PERFORMANCE REVIEW

PROGRAMMABLE THERMOSTAT

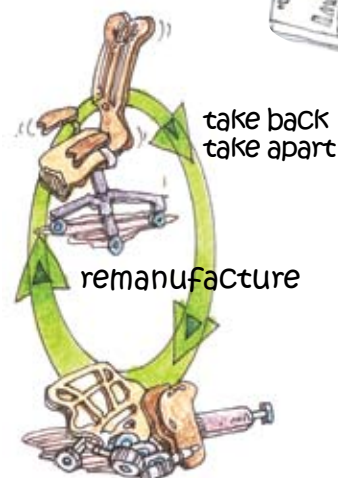

Questions

- What environmental challenges have you recently faced?
- How did you address those challenges?
- What could you have done to not face the challenge in the first place?

If you don't know where you are going, you might wind up someplace else.
