

# Emergency Response - Awareness

Taking time to know your facility's emergency response plan will save time, protect health, safety and the environment.

Understanding your role in an emergency is vital to successfully manage an incident.

It is important to have an emergency response plan to outline roles and responsibilities relating to emergency response.

**The goal of the emergency response plan is to:**

- ensure the safety of workers, responders, and the public
- reduce the magnitude of environmental impacts
- reduce potential for damage to property and product
- assist emergency responders
- reduce recovery time
- inspire confidence in employees, industry and the public

**Do you know where emergency response equipment is kept?**

- first aid kit    fire extinguisher    spill kit    nearest phone or radio    emergency generator

*When you are in a new location take some time to familiarize yourself with where you are and think about what you might do should an emergency arise.*

**Do you know:**

- how to use the emergency response equipment?
- how to notify people in the event of an emergency?
- where to evacuate to?
- who to call?
- how to get help?
- where your emergency response plan is kept?
- your role in an emergency. Are you prepared for that role?
- Who in your work area is trained to respond to emergencies?
  - First aid training
  - CPR training
  - Spill response training
  - Search and rescue training
  - Fire extinguisher training

**Strive  
FOR  
Wise**

**DID YOU KNOW?**

- More information can be found in Procedure T8 - Emergency Response Plan in the EARTH 1st Manual.
- The most up-to-date version of the Emergency Response Plan is available on the main Intranet page under Environmental Performance: <http://walkerhome/environmental/Emergency%20Response%20Plan/Forms/AllItems.aspx>

## February 5, was National Sweater Day!

National Sweater Day was created by the World Wildlife Fund in 2010 and is an opportunity to commit, create and participate by turning our thermostats down by 2 degrees to take action against climate change and work towards a sustainable future.

Thanks to everyone who participated! Check out all of the photos in the EARTH 1st Blog photo library: <http://walkerhome/earth1st/earth1stblog/Lists/Photos/Forms/AllItems.aspx>

YOU ARE WONDERFUL!! CONGRATULATIONS!  
Clearly no group can, as an entity, create ideas. Only individuals can do this. A group of individuals may, however, stimulate one another in the creation of ideas. Estill J. Green
