Innovation & leadership

Dream our world

MUCH OF WHAT **IS** today was THOUGHT to be impossible by most.

It Has all been dreamed into existence by the imagination of great innovators.

HAVE YOU EVER THOUGHT ABOUT THE FACT THAT EVERYTHING YOU HAVE AND USE WAS ONCE JUST PART OF SOMEONE'S IMAGINATION?

It is about taking time to create the future we would like to see.

Imagine a world where:

- we create communities that are net producers of energy from renewable sources
- society is built to support the environment, not consume it
- your work is to be a caretaker of the earth
- no waste is produced that is not food for another
- abundance and diversity are supported
- what you think of as impossible is actual
- factories emit nothing to the air, to land or to water and use only renewable resources
- products we use support our health and the health of our world.

## Questions

What things do you use today that you, your parents, or grandparents would have thought impossible a few years ago?

How would you imagine a society that exists in harmony with nature to look?

What would your workplace be like if it worked in partnership with nature?

What actions would we need to take today to create the future we would like for our children's children?

Thoughts create action - action creates change.

It starts with a wild idea that someone makes into a reality.

*The future belongs to people who see possibilities before they become obvious.*  
Ted Levitt, Harvard Business School
